Connecting to the student wireless network

The **CCCStudent** wireless network requires a password. This password is located on My Chemeketa.

Once you have the password, you can connect to the network.

In Windows 7, begin with the wireless icon in the notification area by the clock.
Bring up the available wireless networks & select **CCCStudent**.

Put in the security key from My Chemeketa.
Windows 7 will connect to **CCCStudent**; be sure to make this a Public network.

In Windows XP, begin in the System Tray next to the clock by right-clicking & looking for the available wireless networks.

Select the **CCCStudent** network from the list, then click “Connect” at the bottom-right.

Enter the network key twice, then click on “Connect” again.

XP will then connect to the network.
